

SabaTEK ERP/POS Product Catalogue

Smart AI assisted business solutions for retail, restaurants, POS, ERP, inventory, accounting, and e-commerce operations.

Built for daily operations

Counter sales, purchasing, stock control, VAT records, financial reports, and customer workflows in one connected platform.

Deployment choice

Managed cloud or VPS hosting for businesses that need reliable access, control, and support.

Overview

One platform for core business control.

SabaTEK helps SMEs move from manual work and disconnected tools into practical systems that support sales, stock control, finance, reporting, and customer service. It is designed around real workflows: cashier counters, restaurant tables, inventory movement, supplier purchasing, VAT invoices, and management reporting.

POS Fast checkout, shifts, receipts, returns, tips, and payment flows.	Inventory Stock levels, purchase flows, movements, cycle counts, and alerts.
Accounting Invoices, payments, VAT, ledgers, journals, and financial reports.	Multi-store Branch-aware operations for companies managing more than one location.
Restaurant Support Tables, orders, preparation flow, tips, and delivery use cases.	Offline POS Continuity patterns for environments where uptime matters.

Industry Fit

Coffee Shops	Restaurants	Retail	SMEs	Trading Companies
--------------	-------------	--------	------	-------------------

Product Modules

Designed around selling, buying, stocking, and reporting.

Front Counter POS Product selection, cart, checkout, receipts, shift opening and closing, cash/card/credit flows, held orders, and offline-friendly operation.	Inventory Control Product master, variants, UOM, stock movement, purchase receipts, cycle counts, valuation, reorder support, and stock exception visibility.
Purchasing and Suppliers Purchase orders, goods receipts, supplier invoices, supplier payments, credit notes, and payable visibility.	Finance and Accounting Chart of accounts, journals, ledgers, VAT-ready invoices, receivables, payables, PDC records, expenses, and financial reporting.
CRM and Customers Customer accounts, order history, balances, B2B readiness, loyalty data, and communication workflows.	Administration Users, roles, permissions, menus, store settings, terminal monitoring, backups, tenant management, and audit logs.
Document Workflow AutoScan document inbox, OCR-assisted review, attachments, and linking scanned documents to accounting records.	Reporting Sales reports, POS shifts, cashier activity, inventory valuation, profit and loss, trial balance, VAT, and operational summaries.

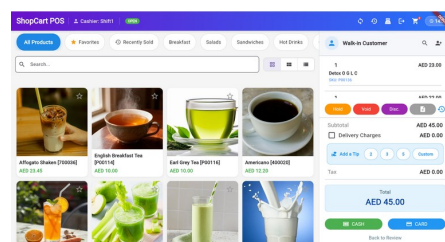

Product Screens

A visual view of front office and back office work.

Dashboard

Daily sales, orders, stock alerts, and manager activity.

POS Checkout

Fast product selection, order flow, totals, and payment capture.

Inventory Valuation Report
